History of Chemistry

The charge of the electron was found to be 1. William Ramsay's discovery, in collaboration with Lord Rayleigh, of argon and other inert gases in the atmosphere extended the periodic table Organic chemistry developed extensively in the 19th cent.

Chemistry History

Boyle 1627—91 is often called the founder of modern chemistry an honor sometimes also given Antoine Lavoisier, 1743—94. This led to the identification of a large number of elements, many of which were metals. .

Acids and Bases

Stahl, introduced the false phlogiston theory of combustion, which held that the substance phlogiston is contained in all combustible bodies and escapes when the bodies burn. Despite the alchemists' efforts, transmutation of cheap metals to gold never happened within this time period. The historical development of the concept of the atom is summarized in.

chemistry: History of Chemistry

You can use it freely with some kind of link , and we're also okay with people reprinting in publications like books, blogs, newsletters, course-material, papers, wikipedia and presentations with clear attribution. Each link for each time interval contains some information about that period.
