

Computerized EMG monitoring in anesthesia and intensive care

MP - Anaesthesia UK : Bispectral index (BIS)

Description: -

-
 Communism -- United States.
 Pacifists -- United States.
 Great Britain -- Description and travel -- Early works to 1800.
 Celtic languages -- Glossaries, vocabularies, etc. -- Early works to 1800.
 World War, 1939-1945 -- Fiction
 Visitations, Ecclesiastical -- England.
 Church of England -- Pastoral letters and charges.
 Minorca -- History
 Bond, Edward -- Criticism and interpretation
 Hemolysis and hemolysins
 Blood -- Diseases
 Weights and measures -- Early works to 1800.
 Arithmetic -- Early works to 1900.
 Meditation -- Church of England -- Early works to 1800.
 Conscience -- Early works to 1800.
 Yiddish literature -- Russia
 Short stories, Yiddish
 Electromyography -- Data processing
 Computerized EMG monitoring in anesthesia and intensive care
 -Computerized EMG monitoring in anesthesia and intensive care
 Notes: Bibliography: p. 105-116.
 This edition was published in 1988

**Does preload affect EMG monitoring?
 : Anaesthesia and Intensive Care Journal**

The amplitude of the EMG response was recorded and measured on the display using cursors. Comparison of a pocket-size ultrasound device with a premium ultrasound machine: diagnostic value and time required in bedside ultrasound examination. MCN Am J Matern Child Nurs.

Anaesthesia UK : Bispectral index (BIS)

There was no dropout recorded throughout the study.

Neuromuscular monitoring in intensive care patients: milliamperage requirements for supramaximal stimulation†

While in group B at 1 minute after intubation mean increase in diastolic blood pressure was +12. While in group B at 3 and 5 minute after intubation mean increase in diastolic blood pressure was +9.

Computing in Anesthesia and Intensive Care

Whatever the monitor, administration of myorelaxant induced a major decrease in both bispectral and electromyographic signals.

Journal of Anesthesia and Intensive Care Medicine

The hand was then thermally insulated.
