## Agriculture and Forestry

Facilities and amenities for employees and contractors living on the farm Employers in agricultural workplaces must ensure that there are satisfactory amenities and facilities for agricultural employees and contractors. Under the HSE Act a health and safety representative is entitled to take two days paid leave a year to attend approved health and safety training.

## Lesson Plans, Teacher Guides and Online Environmental Resources for Educators

AP Computer Science This class is designed for students who plan to pursue a career that relies on computer technology. Since Asian countries are large importers of Montana wheat, it is important that producers and handlers understand the serious health risk and potential economic impact posed by buckwheat. Potential confined spaces should be identified by warning signs to alert people to the hazard.

## Welcome to The Montana Department of Agriculture

It gives you a base to start from and leads you to information from other sources. Young workers, new employees, people doing new or different work and people returning to work after a long time away have a higher risk of being injured. The new signals will enhance both the quality and efficiency of agricultural operations in the future.

## Health and Safety Authority

Manual handling In the horticulture industry, manual handling of heavy objects and the need to carry out repetitive work are often necessary. Students attain knowledge about the field of biotechnology and deeper understanding of the biological concepts used. Floral Design 1 Express your artistic ability while experiencing the world of floriculture.

## **Farm Safety**

Just over one in a hundred workers employees and the self-employed work in agriculture, but it accounts for about one in five fatal injuries to workers. Sickness If practicable, set aside an area where employees can rest if they feel unwell. Students are directed to generic sources of assistance and guidance within the University.

### **detail**

Financial assistance may be available for qualifying students. Line and finish interior walls of timber-framed buildings.

### **Horticulture module**

For example, always wear an approved helmet on a quad bike. This includes physical injuries and early symptoms of possible work-related illness. The employer or person in control of the workplace must tell people doing work about the hazards of the work and what they need to do to stay safe.
