## The Advisers

Regulatory agencies are captured by those they are supposed to regulate.

## Science Advisor Programs

The Working Group made recommendations to the ACD about the funding and training of graduate students and postdoctoral researchers in order to attract and retain the best and most diverse scientists, engineers and physicians from around the world. Randomisation avoids bias Experiments should, wherever possible, allocate individuals or groups to interventions randomly.

## Science Advisor Programs

This tab may also describe opportunities for part-time work, the amount and type of travel required, any safety equipment that is used, and the risk of injury that workers may face.

## Scrutinizing science: Peer review

As a condition of publication, authors must agree to make available all data necessary to understand and assess the conclusions of the manuscript to any reader of Science. Then, when you have assembled all electronic files and other required information, proceed to our manuscript submission and information portal at.

## Top 20 things politicians need to know about science

Comparing the educational achievement of children whose parents adopt a health program with that of children of parents who do not is likely to suffer from bias. To find out, explore what happens when the process is by-passed. Beware the base-rate fallacy. The ability of an imperfect test to identify a condition depends upon the likelihood of that condition occurring the base rate.

### **Policy analysis**

A common practice is to define the problem and evaluation criteria; identify and evaluate alternatives; and recommend a certain policy accordingly.
