{iaps}

This period was rounded off with some Soviet-made three-component seismographs given to the AGO by UNESCO. The fundamental parameters of the network are given in the full report on the Handbook CD. The spatial information captured includes data from satellite imagery, as well as that used in topographic and thematic mapping.

## Seismology

All of the individual members from one country have 1 vote between them. We also call on everyone to support these protests and the implementation of the demands from Fridays for Future. Supplementary Section 1 was contributed by P.

## Seismology

Other topics may also be discussed during the meeting under the other topics point but these discussions cannot be used to make formal decisions, per articles 17. In 1952 the University of Ljubljana began building the Astronomical- Geophysical Observatory AGO on Golovec hill in Ljubljana.

## The seismicity of Mars

In 1966 the AGO managed to acquire instruments that conformed to the standards of the World Wide Standard Seismograph Network. The wind speed is below 2. We would also like to thank Paul Muir, Physics Department, University of Otago, New Zealand for preparing Fig.

**157617560**

The Marsquake Service: securing daily analysis of SEIS data and building the Martian seismicity catalogue for InSight. They can be divided into body waves that travel through the interior of the materials; surface waves that travel along surfaces or interfaces between materials; and normal modes, a form of standing wave.
