## Health and healthcare access among Zambia's female prisoners: a health systems analysis

The Prison Journal, 84 1 , 36-60. This aligns with the prisons decency agenda — to increase attention to prisoners and respect their individual rights , p. If the criminal justice population represents a smaller share of the US HIV epidemic, intervening in the CFs may have a smaller impact on the US population as a whole and may be less cost effective than in 1997.

## The second sentence : the experience and needs of prisoners with HIV in H.M. prison system, England and Wales

Health statistics, like all social statistics, are social constructions. As of the start date for the evaluation, 1 April 1999, 74 clients had been discharged; 42 of the 74 were living in the community and receiving mental health services.

## Health and healthcare access among Zambia's female prisoners: a health systems analysis

On one occasion he was held hostage by another inmate for two hours.

A

Social isolation is a core experience of many ex-prisoners who may end up homeless or with unstable, unsuitable housing. The study did not find that participation in intensive supervision increased the participants' likelihood of technical violations.

## The Social Reintegration of Offenders and Crime Prevention

Disease profile of the prisoners All Prisoners suffered from multiple health problems, as reported in Tables and. Building the field of health policy and systems research: an agenda for action. Unfortunately, this aim was ultimately unfulfilled due to a number of factors: first, the probation service

underwent a major restructure at the time of the study; and, second, legislation across prison and probation systems remains fragmented.

#### **Mental health and wellbeing benefits from a prisons horticultural programme**

Male prisoner The group-working context was initially off-putting for some prisoners e. Largely inductive thematic analysis was guided by the concepts of dynamic interaction and emergent behaviour, drawn from the theory of complex adaptive systems.

#### **The second sentence : the experience and needs of prisoners with HIV in H.M. prison system, England and Wales**

There is a specific focus on coordinating services and assisting offenders to reintegrate into the community during the three months immediately following their release. New York City Department of Health 1999 HIV Seroprevalence Update 1999. Intervention: Any peer-based intervention, including peer education, peer support, peer mentoring, befriending, peer counselling and self-help groups, operating within prisons and YOIs in any country.
