Seventh International Conference on Education and Training in Optics and Photonics : with Opto

It brought together scientists, technicians and educators to discuss educational programs and the opportunities and challenges for graduates. In this paper we present our approach to teaching lens design.

ETOP Proceedings

Full-text PDFs of conference papers are available to OSA Publishing subscribers or through one of the purchase options mentioned on our. Although lens design involves simple geometrical concepts, the grasp by students of this discipline is not easy.

Trends in teaching lens design

This paper celebrates the continued success of the LPD and shares the knowledge gained with an overview of its design and use in STEM-based outreach events. Khorana, Rose-Hulman Institute of Technology 24 papers;. Nowadays ETOP conferences have as permanent sponsors ICO, IEEE, OSA, and SPIE.

To celebrate this rich heritage and promote public awareness in optics and photonics, the SPIE Student Chapter at the Air Force Institute of Technology AFIT developed the Laser Propagation Demonstration LPD. Fortunately this is also true in what concerns materials to be used in hands-on experiments based learning covering virtually all fields of optics and also intended or adapted for use at all school levels. Initially developed with funding from a LaserFest grant awarded by SPIE in 2010, the goal was to develop a simple hands-on demonstration to highlight the optical effects of diffraction, refraction, and attenuation on laser propagation. Through presentations, panel discussions, workshops and exhibits, it is the intent of this conference to inform professors, students, teachers and professional trainers on how to promote the learning of optics and photonics for the future.
