## Plants Profile for Chenopodium murale (nettleleaf goosefoot)

The capsule is subtended by pinkish bracts and sepals. The dark green, glossy leaves have toothed edges and they give off a strong smell when you crush them. It's very attractive and draws some serious attention when it gets to a bigger size.

## Chenopodium

If you think that the traditionally grown Syngoniums were normally all about the light green and whites markings.

## Goosefoot, lamb's quarters (Chenopodium) Genus Level details and Allergy Info

In addition, these South American plants flourish in arid lands and are promising cultivated food crops for other regions of the world. It was introduced to the Americas by settlers. We'll talk about your cardiovascular system and immune system, physical therapy, and health issues related to your muscles, bones, and joints.
