U.S. Medical Eligibility Criteria for Contraceptive Use, 2010

According to an investigative report by The Associated Press published at the 28 June 2020, the Chinese government is taking draconian measures to slash birth rates among Uighurs and other minorities as part of a sweeping campaign to curb its Muslim population, even as it encourages some of the country's Han majority to have more children. Thus far, data show that globally slightly more men than women are contracting COVID-19, being hospitalized, being admitted to intensive care units, and dying.

Population Index

The conditions affecting eligibility for the use of each contraceptive method were classified under one of four categories. Changes in the seasonality of both births and marriages over time suggest that the modernization of Japanese society after the second World War could be responsible for the drastic changes in the pattern and degree of seasonality of births. Women who had an abortion in that hospital in 1991 were asked about recent abortions as part of a survey about women's health.

International Family Planning Programs: Criticisms and Responses

We also aim to overcome regulatory and policy barriers that slow the uptake and introduction of high-impact family planning interventions. Basing assessments of the long-term contraceptive use rate, and on the rates of sterilization and IUD use would no longer be appropriate.

Contraceptive Security Indicators Survey

Cohort fertility data for the Netherlands are examined to determine the probability of becoming a grandparent. Mason, East-West Center, Program on Population, 1777 East-West Road, Honolulu, HI 96848. The data we shall present will refer mainly to Italy, but we shall try when possible to extend our view to other European countries.

Logical framework of quality of care in family planning in China: client

The Interagency Gender Working Group Male Engagement Taskforce hosted a virtual forum in September 2020 about key issues facing men and boys during the pandemic. Brouillette, Liliane; Felteau, Claude; Lefebvre, Pierre. We also engage on a more limited scale in Kenya, Pakistan, and Francophone West Africa.

COVID

Second, 'gatekeepers' can be a major barrier to women seeking abortion services.
