Five

With its revised priorities, the Janta Government Strategy favoured Gandhian solution which stressed for the development of cottage and small industries based on labour-intensive techniques. As a result of various development programmes undertaken during the Plan, the rate of investment went up from 5% in the first year to 7. Population was increasing more as compared to economic growth.

Five Year Plan of India: Objectives, Approach to Plan and Concepts

It was noted that since independence the inception of planning, Indian economy has made steady progress towards the basic objectives of building an independent, self-reliance economy. This is the last 5 year plan as the status of the twelfth Five Year Plan is in question because of the termination of the Planning Commission. For achieving a higher rate of economic growth Fifth Plan draft was also based on a wrong assumption of incremental capital-output ratio ICOR of 3.

The First Five

Accordingly, the growth rates of industrial sector which was only 4. Objectives: The main objectives of the Second Five Year Plan are as under: i) Sizeable increase in the national income to raise the level of living. This became evident by the time of the Third Plan which laid a relatively greater stress on growth of agriculture to achieve self-reliance.

Five Year Plan of India: Objectives, Approach to Plan and Concepts

Further, it endeavored to eliminate rural poverty and reduce regional disparities through the Integrated Rural Development Program IRDP — 1979. It was thought that the private sector lacked the necessary resources and the proper mindset to bring about rapid economic growth. Efforts would be made to maximise the production.
