### Alfalfa

It takes just 1 pound of alfalfa to make each pound of alfalfa pellets. Climate Zones 1A, 4, 5, 6, 7, 14, 15, 16, 17 Plant Type Perennials Exposure Full Sun, Partial Sun, Shade Season of Interest Spring Early,Mid,Late Summer Early,Mid,Late Fall Water Needs Low, Average Maintenance Low Soil Type Chalk, Clay, Loam, Sand Soil pH Acid, Alkaline, Neutral Soil Drainage Moist but Well-Drained, Well-Drained Characteristics Showy Tolerance Deer, Drought, Rabbit, Salt Landscaping Ideas , , , , , Garden Styles , , , , , Join Gardenia.

### Pacific Northwest Big Game Food Plot Seed Blend

At this facility we grow, harvest, pack and ship high quality Alfalfa and Timothy Hay. Alfalfa Hay Alfalfa hay is a high protein, highly nutritious hay that is fed to horses requiring increased levels of energy, such as performance horses, young and growing horses, and lactating mares. Wet forage will rot on the ground if it does not dry properly.

### Western Oregon Hay

Grasses: Timothy The long stem of Timothy hay provides a good source of consumable roughage. As for the orchard and timothy, they grow best in a cool and moist environment so we contract with farmers in Northern California and Oregon.

### Best Perennials for Gardeners in the Pacific Northwest Region

With our focus on quality and service, Creech Inc.

### Dairy

A mixture of Holsteins and Jerseys, our cows have plenty of access to organic pasture, ample space in well-tended barns and are milked at their own discretion via semi- and fully robotic milking systems.

## **Best Perennials for Gardeners in the Pacific Northwest Region**

Along with selling feed to top performance horses, we also supply forage to boarding facilities, training stables, lay up farms, breeding facilities, amusement parks and entertainment, and the single horse owner. And, wet hay bales can heat up and spontaneously combust.

### **Western Oregon Hay**

Heat Zones 1 - 6 What's My Zone? Road Straw Because of our high standards of quality, occasionally we will receive an incoming load of straw which we will grade as unusable for premium horse bedding. We have been delivering hay, grain, and bedding to Southern California for over 20 years and are currently selling feed coast to coast.
