Mail flow: Exchange 2013 Help

The categorizer picks up one message at a time for categorization.

How to Configure a Relay Connector for Exchange Server 2010

Does these steps should we perform in each forest? Currently all of these 3 are ticked which probably is not ideal. Note Before you create the Send connector, you first need to run the Get-Credential command to save the username and password you will use in a temporary variable.

Mail flow: Exchange 2013 Help

It is now strange to me that telneting drops email but it still will not work in sharepoint workflow. Appreciate your support on this, Regards, Khalil Sorry, I meant: Does these steps should we perform in each forest? Your method here seems like it will work if we can find a server to use.

Mail flow: Exchange 2013 Help

One is responsible for sending outbound mail to Internet recipients; the other is responsible for sending inbound mail from the Internet to internal recipients. At the end of the Backup it tries to send a notification email but is currently failing authentication required.
