## How to combine the entry of young people in the labour market with the retention of older workers?

Up to nine additional Member States will be supported in their outreach activities in 2016–2017. An econometric analysis is conducted using annual stock and flows data from the Employment Survey on youth unemployment by sex and educational qualification. Implementation started in 2014, with key measures being rolled out progressively.

**EUR**

This Communication contributes to this process by demonstrating the main success factors and identifying areas where further action is necessary. The 2015 European Pact for Youth builds on these initiatives by promoting quality business-education partnerships. On the other hand, it has been found that job-changes promote further job-changes occurrence dependence and that early job instability significantly reduces later wages see, e.

## Youth unemployment and active labor market policies in Europe

YEI implementation significantly progressed in the second half of 2015 and especially in 2016. Their decision to take up employment should be regarded as a positive choice and an alternative to formal education. To reduce short term labour turnover, many countries introduced a specific unemployment contribution rate for employers.

## Cedefop: Data for European countries presented by indicators

Among other reasons, this pattern may be a reflection of lower life chances and weak local labour markets which may act as a push factor to drive away more talented students.

## How to combine the entry of young people in the labour market with the retention of older workers?

Rather, this is generally beneficial for overall labour market performance in easing the burden of ageing on the welfare state in order for young people to also benefit from the higher employment of older workers.
