## Cage

Hopefully, cage birds we are sheltering will have their own cages with them, but that is not always the case. If covering birdcages at night, leave the bird space where it can peek out and see what's going on.

## Cage & Aviary Birds

Flexible staging allows plenty of room for creative interpretation.

## Cage

Try not to leave birds in the middle of a room or open area in an open cage. Some birds may also have microchips, so check any found or rescued birds for chips on admission.

## Cagebirds by David Campton (One

An essential resource for members of bird clubs and societies, it also offers an unrivalled marketplace for sellers and buyers of birds and all bird-related products, both in the British Isles and around the world.
