

# Textbooks and quality learning for all - some lessons learned from international experiences

## Unesco - Don't Fear Failure: Nine Powerful Lessons We Can Learn From Our Mistakes

Description: Focused on the dual aspects of access and quality, this publication discusses the role of textbooks in facilitating quality education for all. The book consists of two reviews with international perspectives: the first focused on supply, access, and content and the second on didactics and impact; two chapters, one on Brazil and the other on the Russian Federation, that review the challenges of developing, evaluating, and distributing high-quality, affordable, and relevant textbooks for all in these federal contexts; a sixth element that analyses the impact of development interventions on textbook provision; and an exploration of the relationship between textbook content and identity-based conflict in Rwanda. The authors document strategies that could help to optimise procedures of textbook development, production, and evaluation; enhance textbooks pedagogical impact; improve teachers' selection of textbooks; raise textbook supply efficiently; and constructively manage textbook and identity development in federal contexts, countries of transition, or zones of post-conflict reconstruction. This book aims to be of interest to academics and practitioners in this area, including teachers, specialists in pedagogy, curriculum developers, policy-makers, professionals in textbook production, and development agencies.

## 5 Valuable Life Lessons to Learn From Quality Management

Metrics serve as indicators of project management maturity and enable the organization to identify important events and trends. International agricultural research has yielded numerous interventions that can contribute to this but their successful adoption and adaptation requires staff of agricultural research, education and development institutions to be fully aware of these through in-service training.

When we experience the consequences of mistakes, we get a clear message about which of our efforts are working--and which are not. These can be selected individuals from the different project areas or the whole team. This can be a time-consuming activity instructional design, providing resources, assignments and other activities, monitoring discussions, helping learners through online messages, e-mail, telephone but is rewarded by a high retention rate of learners.
