Strange Situation A series of mildly stressful experiences involving the departure of the parent and exposure to a stranger to which infants are exposed to determine the quality of their attachments; developed by Ainsworth.

**Nerve cell biology : proceedings of the joint British Society for Cell Biology**

We thank our editor, Jaime Perkins, for his capable leadership of the project, and Tali Beesley, our development editor, for her thorough and thoughtful readings of each chapter and special efforts to make this edition the most visually appealing and pedagogically effective edition yet.

**British Society for Cell Biology**

Expertise and the adult learner. In addition, we introduce new topics and controversies in life-span human development, update coverage throughout, and offer new pedagogical features and supplements to enhance the teaching—learning process. How might society react to organ growing? The existence of these sections is proof that the chapters consider development in each of the domains covered across the whole life span.

**Nerve cell biology : proceedings of the joint British Society for Cell Biology**

Maternal sensitivity during infancy and subsequent life events relate to attachment representation at early adulthood.

**What is a cell?**

Contrast with gross motor skills. Fundraising is often part of the job description in nonprofit organizations that depend on grants and donations for

their survival.

### **What is a cell?**

Some students may wonder why they are there.

### **Nerve cell biology : proceedings of the joint British Society for Cell Biology**

Theoretical models of human development 6th ed. These chapters establish how both genes and environments contribute to both typical changes and individual differences throughout the life span.
