Driving these threats are the growing human population, which has doubled since 1970 to 7. Although laws are in place to catch and punish the offenders, the execution of the same is still a challenge for the government. Information Access Company, Copyright 1998.

Essay on Depletion of Natural Resources: 8 Selected Essays

If we keep muddling through, we can be as sure as death that Mother Nature will give the final verdict. This shows that, limited to the scope of the population living within a single given political boundary, particular human populations do not always grow to match the available food supply.

Resources for Entropy and Human Activity: Citations from prior student term papers

Humans everywhere must understand that rapid population growth damages the Earth's resources and diminishes human well-being.

Mother Nature's Revenge

There have been three major technological revolutions—the tool-making revolution, the , and the —all of which allowed humans more access to food; hence increasing the , resulting in subsequent population explosions. Disposition of High-Level Waste and Spent Nuclear Fuel. Characteristics and spatio-temporal variability of the amazon river basin water budget.

Essay on Depletion of Natural Resources: 8 Selected Essays

Controlled consumption of resources is to be encouraged. At the turn of the 20th century, the world's population was roughly 1. We are facing the fact that there will be seven and, in the nearby future, even eleven billion potential car owners in the world.
