## Honoring Resident Autonomy in Long

The ability to give informed consent may be impaired by illness, denial and multiple factors. Finally, the percentages of residents who were physically restrained, chemically restrained, or on Medicare and Medicaid were computed using current nursing home census information.

## Autonomy And Long Term Care PDF Book

Autonomy issues in long-term care settings arise around basic, repeated activities of daily living, such as grooming, dressing, and dining, rather than around discrete events, such as whether or not to undergo open-heart surgery. Personal choice may not be honored when the choice being made is inconsistent with the autonomy of staff, family members, or other residents.

## RESIDENTS' AUTONOMY: Nursing Home Personnel's Perceptions

Abstract This article documents the results of a study on the perceptions of long-term elder care in Beijing in the People's Republic of China by those most intimately involved.

## George J. Agich, Autonomy and Long

Severely disabled individuals are still able to make their own decisions, and it is important for nursing home staff to respect this aspect of personal autonomy.
