The Case of the Buried Clock (TV Episode 1958)

In the best series tradition practically every single member of Hardisty family could qualify for a prime suspect, so Perry Mason to the rescue! Anyway, I love the Mason books and still recommend reading them. This book has it all: an exciting courtroom drama, a complicated mystery, astronomy and astrology lessons, and finally Perry Mason outsmarting himself!!! So as it was obvious from my babbling above this one is among the best books of the series so far.

I love the appealing mountain setting. Blane searching the house and Jack shot dead.

The Case of the Buried Clock book by Erle Stanley Gardner

They're quick reads, most aren't incredibly memorable, but they're interesting and relaxing and I enjoy them! And the solution to the puzzle is remarkably simple to the extent that I was slightly disappointed. Or is there a more mysterious explanation for the time it is keeping? I love the appealing mountain setting.

The story keeps you guessing till the end. After catching his shady son-in-law, Jack Hardisty, in the act of embezzling, wealthy banker Vincente Blane plans to hang him out to dry.
