Because the analysis of such non-commercial petroleum deposits commonly yields valuable regional resource-trend information, we collected and characterized the reported CNM petroleum residue and compared the results with identified oil types in the Uinta-Piceance Province. Those counties in which the pigeon population is considered as moderate to large include Archuleta, Conejos, Dolores, Douglas, Eagle, Gunnison, Huerfano, La Plata, Las Animas, Montrose, Ouray, Pitkin, Pueblo, Rio Grande, and San Miguel. The baseline data collected during this period will help pa.

Fires are prohibited within the monument. Few birds are controlled so completely by available food sup- plies as is the bandtail. Wheelock 1904 , and Cooper 1880 report ground nests, but no other similar nestings have been re- corded.

Alaska and Aleutian Archives

A total number of 4235 participants were recruited during the survey. Open shooting seasons, how- ever, are not the remedy for specific instances of depredation for because of the habits of these birds control of depredations by hunting could be realized only through general and widespread population reduction, which is undesirable.

Geology of Alaska

Pigeons were numerous ; wild berry patches in the tim- ber attracted large numbers, which at times invaded the cherry orchards.

Geology of northern Kanaga Island, Alaska (Book, 1956) [vip.stumagz.com]

The oldest and most calc-alkaline of these is the ~10 km wide Hidden Bay pluton on Adak Island, which intrudes the early Tertiary Finger Bay Formation.
