## Kebara Cave, Mt. Carmel, Israel, Part I : Ofer Bar

Advances in Archaeological methods and Theory, 1, p. The state of their teeth, as mentioned above, is an additional argument to support this contention. From Our Blog This year challenged the way people do many things.

## Kebara Cave, Mt. Carmel, Israel, Part II — Liliane Meignen, Ofer Bar

Though we cannot be certain, it is unlikely that a body could be preserved in anatomical position without protection. Unwary archaeologists must read this report and change their ways.

## Kebara Cave, Mt Carmel, Israel : The Middle and Upper Paleolithic Archaeology, Part I

Journal of Archaeological Science, 26, p.

## The Paleolithic Burials at Qafzeh Cave, Israel

These reasonably well preserved burials are distributed within the excavated layers from XVII to XXIV.

## Kebara Cave, Mt. Carmel, Israel, Part I : Ofer Bar

This present volume, the first in a series, reports on Mt Carmel's southernmost cave at Kebara. Thus while we are certain that the Mousterians at Qafzeh provided special treatment to several of their dead, we do not know why. Archaeology in Israel: The caves are located on the western slopes of Mt.

## **New radiocarbon dating of the transition from the Middle to the Upper Paleolithic in Kebara Cave, Israel**

We thank the Centre de Recherche Français de Jérusalem, The Hebrew University of Jerusalem, Tel-Aviv University and The University of Bordeaux for providing assistance at different times. Did Homo Erectus have fire? Because of this separation between cave and terrace, in 1965 it was decided to use a different numbering system for the layers of each area. Please note that not all the different versions of each author were summarized in this table 000 1.

### **Publication**

From the Acheulian complex, at least 500,000 years BP, through the Mousterian culture of 250,000-45,000 years BP, and up to the Natufian culture of 15,000-11,500 years BP and beyond, it testifies to at least half a million years of human evolution.
