Hummingbirds can see into the near-ultraviolet, but hummingbird-pollinated flowers do not reflect these wavelengths as many insect-pollinated flowers do.

## All About Hummingbirds and How to Attract Them

The Rufous Hummingbird, if based upon distance traveled in proportion to body size, undertakes the longest avian migration in the world. At just over 3 in long, rufous birds travel 3,900 miles one-way from Alaska to Mexico in late summer, a distance equal to 78,470,000 body lengths. Some Anna's Hummingbirds are resident where food flowers and feeders and shelter is readily available.

## Watch Hummingbirds

In the tropics, hummingbirds often move up and down mountains and between arid and moist habitats to keep up with where the trees and shrubs are flowering. Their beak will point up at a sharp angle and their feathers will fluff out, making them look like a cotton ball.
