Measurement and Evaluation Tools

Critics blame the field of HRQOL study for greatly ignoring the response shift, a change in values, views and ideals that can occur in patients as a result of their advancing condition and treatment, altering their perceptions of health and quality of life. Becker M, Diamond R, Sainfort F.

Factors associated with quality of life in patients with depression: A nationwide population

The diabetes patients also reported less satisfaction with health but not with other life domains.

Health

Studies which ignore this definition will be considered amateur and will not be held by academic standards.

Quality Measures

Therefore, QOL is a one-dimensional concept with multiple causes.
