Stem Cell Pioneers

In 1918 Carl was assigned to a barracks that served as a hospital for infectious diseases near the front lines on the Piave River in Italy. The co-operative efforts of American chemists, chemical engineers, microbiologists, mycologists, government agencies, and chemical and pharmaceutical manufacturers were equal to the challenge posed by Howard Florey and Norman Heatley in 1941.

Research and Discovery: Landmarks and Pioneers in American Science : Lawson, Russell: Amazon.sg: Books

The drug was shown to be effective in the treatment of a wide variety of infections, including streptococcal, staphylococcal and gonococcal infections. Drugs are available to keep HIV and AIDS under control.

National Historic Chemical Landmarks

Goldstein wants to use his stem cell lines to study Alzheimer's disease. Under Fermi's guidance, Manhattan Project scientists produced the first controlled nuclear chain reaction, a breakthrough that led to the production of the world's first nuclear weapons.

Discovery & development

Carl Cori found working with Loewi, who discovered that acetylcholine was the substance that led to vagus stimulation of the heart, intellectually rewarding.

Research and Discovery: Landmarks and Pioneers in American Science [Review]

In October, researchers from the Massachusetts Institute of Technology showed that they could do this in mouse embryos. Mary's Hospital, London, Alexander Fleming discovered penicillin.
