. Submitted November 23, 2009 12:34:33 by I have a VIC20 that my Grandfather gave me that doesn't work :-.

My Vic20

I have several cartiridges and about 40 Cassettes with programs on I typed in from the Compute and RUN magazines, as well as programs I just created myself.

Commodore Vic 20

IF you want a quote on your shipping to your address please contact me BEFORE you bid! My dad bought it for me when I was nine years old. The function keys however are orange while the original had brownish ones.

How to use the VIC 20 computer (Book, 1984) [vip.stumagz.com]

My old unit and the new case I bought are perfect and ready for Ryzen gaming builds. It did have an expansion port on the back that would accept cartridges for memory or programs. The disk drive is also boxed.

Power20 Documentation

Two of my favourites were 'Radar Rat Race' and 'Clowns' which I still play via emulation on a PC. Therefore 0 is used to mark the end of the string .
