Harvard University Press - Unnatural Nature of Science

Who benefits from Conventional Explanations of Natural Hazards?

- Natural explanation
 - disasters are inevitable and unchangeable.
- Culpable agents:
 - organizations, governments, etc., are exonerated and probably benefit from the event.
- Social science:
 - looks for the geographies and histories of an event to highlight the interaction of nature and society
 - so that natural hazards can be argued as not always inevitable.

The Unnatural Nature of Science: Why Science Does Not Make (Common) Sense by Lewis Wolpert

Aku rasa bermula dengan bahagian satu pertiga terakhir buku ini baharulah gear perbahasan dinaikkan dengan penulis mula menyerang dan menjawab kritikan demi kritikan terhadap sains moden yang dihadapkan oleh sosiologi dan sejarahwan sains.

Unnatural Nature of Science

Do others think that forming social policy through scientific research is workable? Students watched the tape of a job interview during which the applicant was confronted with this issue and either denied or apologised for it. The reward for advances in each of these fields is also vastly different.

Analysis Of Lewis Wolpert's The Unnatural Nature Of Science

My totally unscientific estimate is that 10% of them enter politics for selfless reasons, 10% of them enter politics for personal gain, and the rest of them are somewhere in between. References: References to papers in the links above, and as ever on the Auschwitz survey.
