

# Hōritsugaku

## Nihon Hyōron Sha - Keiyakuhō. (1983 edition)

|   |                        |                        |
|---|------------------------|------------------------|
| Treatment election:                         | High stimulus          | Low stimulus           |
| Outcome election:                           | Low stimulus           | High stimulus          |
| Two elections are<br>exactly concurrent     | Mobilization           | Mobilization           |
|   | Cost Sharing           | Cost Sharing           |
|   | Psychological Stimulus | Psychological Stimulus |
| Two elections are<br>proximately concurrent | Mobilization           | Mobilization           |
|   | Cost Sharing           | Cost Sharing           |
|   | Psychological Stimulus | Psychological Stimulus |

Note: The outcome variable is voter turnout in an "outcome election," while the treatment variable is whether or not a "treatment election" is held concurrently with the outcome election. Each cell shows possible treatment(s) which can explain the effect of concurrent elections.

In addition to civil conciliation in the courts, local bar associations provide arbitration or mediation services to promote prompt and reasonable resolution based on expertise. As to the latter, critical reviews are made on a recent decision of the Supreme Court of Japan on product liability of pharmaceutical companies.
