Assessment

Typically, individual student cubicles were set up to block the noise made by the machines. Although several early studies showed benefits of television over teacher instruction, later reports revealed that support for instructional television had diminished significantly. At the same time, in-service teachers can benefit from ongoing professional development on the integration of technology to enhance their teaching.

Development and validation of a recommended checklist for assessment of surgical videos quality: the LAParoscopic surgery Video Educational GuidelineS (LAP)

Although film continued to be widely used by the government for armed forces training, agricultural demonstrations, and public relations, the impact of film in the classroom was minimal. At a time when commercial filming was struggling and educators were questioning the merit of film in classrooms, strong advocacy for educational sound films was lacking.

Most U.S. Students Lack Writing Proficiency, National Assessment Of Educational Progress Finds

The LAP-VEGaS video assessment tool resulted highly accurate in identifying and selecting videos for acceptance for conference presentation and publication, with high level of internal consistency and generalisability.

Educational Assessment Reports, Guides, Presentations, Videos and White Papers

Follow-up of applications submitted to two institutional review boards.

Videos

Most often, the system introduces students to new concepts by asking students to explore a specific topic through manipulation of genetic traits of a fictitious species of dragon.

Development and validation of a recommended checklist for assessment of surgical videos quality: the LAParoscopic surgery Video Educational GuidelineS (LAP)

To demonstrate their understanding, students can create multimedia productions, construct websites to organize and analyze information, and design interactive presentations to serve as products for assessment.

Videos

This trend also appears to hold true for writing, though the format may have changed. In general, evaluation of programmed instruction in the classroom showed that although implementation was difficult, the combination of teacher instruction and programmed instruction was more effective than either method used in isolation. It is often characterized as load that arises from a poorly designed lesson e.
