Gamification involves turning an activity into a competitive game, creating rewards for winners, and creating that unique and novel spark that will attract the interest of students. Despite cross-national differences in educational settings and frameworks, teachers around the world may wish to consider these strategies for addressing symptoms of trauma evident in certain student behavior patterns. Teachers have few strategies to deal with the kind of behaviour that these children present as little, if any, of their training is allotted to classroom and child management.

A mock trial, a mock city, a simulation—all of these simulation options are great ways to enhance a classroom setting and make students feel more engaged. Once I began using the FAIR plan, this child became happy and free! During my student teaching assignment, I had a second grade student with a diagnosis of Oppositional Defiant Disorder ODD.
