**Neuropsychology for Occupational Therapists; Assessment of Perception and ...**

Divided into two parts, the first introduces

the fundamental role cognition has in occupational performance, before moving on to examine the theoretical frameworks behind cognitive rehabilitation.

**Neuropsychology for Occupational Therapists; Assessment of Perception and Cognition Second Edition by June I. Grieve**

The second edition of this successful textbook provides the occupational therapy student with descriptions of perceptual and cognitive abilities, supported by theoretical models. The second part covers the key components of each cognitive function, including attention, visual perception, movement, memory, and executive functions, and the disorders associated with them.

**Neuropsychology for Occupational Therapists; Assessment of Perception and Cognition Second Edition by June I. Grieve**

Neuropsychology for Occupational Therapists is a bestselling, comprehensive guide to the assessment and rehabilitation of impaired cognitive function and brain damage.
