Nor should we underestimate the influence of French and French-inspired work in histoire du livre, work in the German-speaking world in the 80s on the history of transmission, Überlieferungsgeschichte, and the extensive work in orality and literacy on both sides of the Atlantic in the late 70s and 80s in fact pretty much everything that went on in literary and cultural studies from the late 60s onwards, subsumed under the general heading post-structuralism, which, among other things, de-emphasised or denied outright the importance of the author, focusing instead on the inevitably collaborative nature of literary production, dissemination and reception and the cultural, historical and ideological forces at work in these processes. Moraines, masses of rock which become detached from the hill-side and find lodgment on a glacier are so called, and are further described as lateral, medial, terminal, or ground moraines, according as they lie along its edges, its middle, are piled up in mounds at its end, or falling down crevasses, are ground against the rock underneath. Mansard, the name of two French architects, born in Paris—François, who

constructed the Bank of France 1598-1666 , and Jules Hardouin, his grand-nephew, architect of the dome of the Invalides and of the palace and chapel of Versailles 1645-1708.
