What symphony of the last thirty or forty years is even remotely comparable with those of Brahms? The recapitulation is an altered repeat of the exposition.

### Reviews of all the Brahms Symphonies by Eduard Hanslick

This is halted in bar 156 with an elaborate cadential pattern in G Minor ending on bar 160. The opening 8 bars are repeated in bars 9; with some decoration, harmonic substitutions and other changes.

The Andante softens this mood with a long drawn out noble song, which experiences surprising interruptions in the course of the movement. Consider specific musical elements where necessary, such as melody, accompaniment, tempo, texture, vocal or instrumental effects, and so on.

### Music 344—Encounter 4

Throughout the opening phrase the left hand part begins to slowly descend, while the diatonic opening theme floats above in the right hand. Because the tonic of this movement is major, the second subject group will appear in the dominant key, if the tonic was minor we would expect this to be in a minor key ; therefore, we would expect the key for this section to be G Major. Listen to each work below as often as you can, study the scores, and learn what the NAWM notes say about each one.
