## Boserup's Theory on Technological Change as a Point of Departure for the Theory of Sociometabolic Regime Transitions

Malthus wrote his essay in 1798 before the industrial and agriculture revolution therefore he excluded technology from his theory therefore making it slightly inaccurate. In his famous An Essay on the Principles of Population, Malthus shows as that: 'the populations of the world would increase in geometric proportions the food resources available for them would increase only in arithmetical proportion.'

### Local vs. Global

It is with regard to change in the make of tools. She suggested that population growth has enabled agricultural development to occur. For instance, forest fallow explains the tribal way of life prevalent in this period.

The soil in this stage is compact instead of becoming loose.

### Thomas Malthus, Ester Boserup, and Agricultural Development Models in the Age of Limits

However, Malthus also argued that there are preventative checks and positive checks on population that slow its growth and keep the population from rising exponentially for too long, but still, poverty is inescapable and will continue.
