The Octopus

Frank Norris is not a spare writer. Perhaps I shall have something to eat at Guadalajara. Thus I went into The Octopus with a fairly open mind.

Overall I found this similar in story and tone to The Grapes of Wrath, only it's the Railroad the titular Octopus squeezing out mid-sized farms rather than the Bank and Big Farm squeezing out the poor farmer.

His eyes were a dark brown, and his forehead was the forehead of the intellectual, wide and high, with a certain unmistakable lift about it that argued education, not only of himself, but of his people before him. A poor immigrant could not escape their life of poverty because their preconditions were the only formative aspects in his or her existence that mattered. Excerpted from The Octopus by Frank Norris.

This book--as all of Norris' works are--is an example of the Naturalist movement in American Literature. How do you root for that? It's really striking how some passages of this book feel so modern they could've been written in the 1950s, while others feel so old-fashioned they could've been written in the 1850s. It means that the author makes his points again and again-- he hammers them into you-- which is admittedly a different style from what most readers today are used to, but it also gives the book its unusual power.
