Research and Analysis

Materials costs rose quite strongly in 2017, driven in part by the fall in Sterling exchange rates. Additional presentations are available at a reduced rate.

Tender to rise by up to 6% a year

Clients will have access to several monthly and quarterly-updated data publications. The accuracy and reliability of the OPIs is dependent on that of the source data. Only twice in 50 years have we experienced construction cost deflation, 2009 and 2010.

Market forecast: Uncertainty looms

Tight industry supply and favorable market conditions will keep North America nylon demand steady, and strong agricultural industry fundamentals will continue. But the covid vaccination rollout will slowly provide some underlying economic stability, barring any impediments to the programme.

Market Moving News

Information on how these are delivered are represented in section five.

Market Moving News

This is because it is tailored only towards direct costs of goods sold and not indirect fixed costs such as rent and insurance, which are included in an alternative such as operating profit. This would have an inflationary effect. Total volume of work is declining and new projects available out to

bid is still depressed, so pressure on margins still exists.

Market forecast: Uncertainty looms

We can always expect some margin decline when there are fewer nonresidential projects to bid on, which typically results in sharper pencils. On occasion, the BER undertakes a long-term roughly 15-year baseline and scenario forecast round.
