## The use of antibiotics for the preservation of food products

Analysis of antibiotics by liquid chromatography—mass spectrometry. Another factor contributing to their adaptability is that individual cells do not rely on their own genetic resources.

77567036

Determination of lasalocid with sensitized terbium III luminescence detection.

## The use of antibiotics for the preservation of food products

Integration of screening kits liquid-chromatography. More than doubled in length compared to the fifth edition, the sixth edition comprises 3000 pages over 2-volumes in order to cover all new and existing therapies, and emerging drugs not yet fully licensed.
