Microbiologic Diagnosis Microbiologic diagnosis is usually not sought. This suggested that microbial acid production was not the exclusive determinant of decay and that S mutans had to possess other attributes which were responsible for its virulence. They have designed simple chairside tests that can, in a semiquantitated manner provide information on the salivary levels of S mutans.

## Essential microbiology for dentistry (3rd edition)

Early-Onset Periodontitis EOP and Adult Periodontitis AP The more common forms of periodontitis comprise at least two clinical entities, an early onset form in mainly young individuals and a chronic form seen in older adults. This hypothesis, then, attributes some of the success of water fluoridation and topical fluorides to an antimicrobial effect.
