### Problems in Structural Inorganic Chemistry

Metals and alloys Formula index Subject index. Arsenic, antimony, and bismuth 21. SINCE the first studies of crystal structures were made by the Braggs in 1913, there has been an ever-increasing flow of structure analyses carried out, first by the X-ray method alone, and later in addition by other techniques.

### STRUCTURAL INORGANIC CHEMISTRY

One outcome of this mutual interaction between structure analysis and the older sciences has been the appearance of various monographs, and, to a lesser extent, the adoption of a new 'slant' in the treatment of old subjects in less specialized works; but it was probably true to say that no textbook of inorganic chemistry showed a complete assimilation of the results and implications of the new subject.
