**Aphanisis**

Formed in ambivalent relation to others, sexuality and sexual identity permeate the bonds of civilization and ramify throughout all social relations. Even in ostensibly individual psychology, there is always another involved, as model or object, as site of identification or as object of love.

**Jacques Lacan**

The most obvious parallel with Winnicott 1966, 1971 has to do with times of the mother's absence, briefly at first, but growing with the infant's ability to tolerate delay of need satisfaction.
