## Cognition, The Menstrual Cycle, and Premenstrual Disorders: A Review

If weight loss alone is not successful, clomiphene citrate can be used. Starvation has been shown to decrease GnRH release and subsequently decrease gonadotropins. N Engl J Med 321: 1002, 1989 Lee CS, Galle PC, McDonough PG: The Laurence-Moon-Bardet-Biedl syndrome.

### Menstrual cycle: What's normal, what's not

The LH to FSH ratio is slightly increased but the LH response to GnRH stimulation is delayed. In light of these methodological concerns, their findings are therefore only preliminary. Infertility in this population is 25—50% following transplant.

Reproductive status mirrors the physiologic state and the external environment. PHARMACOLOGIC AGENTS Estrogen and progesterone effect gonadotropin release indirectly using biogenic amines as intermediaries.

## Cognition, The Menstrual Cycle, and Premenstrual Disorders: A Review

Hirsutism may suggest PCOS, CAH or an androgen secreting tumor. Studies have similarly been inconclusive, mainly due to the heterogeneity of different tests used measuring varying aspects of executive function. Timing of testing in the luteal phase also varied slightly between studies.

### Menstrual disorder
