Tervuren: MRAC, Annales, Série in-8°, Sciences humaines 51. In the realm of grammatical theory, it is often difficult to fill this lacuna as it pertains to phonology, since it is impossible to construct specific grammars to see if they are learnable or to see whether one kind of fact entails another. Especially in verbs, the highly agglutinative morphology of Bantu makes possible great variation in the position of an underlying tone relative to other tones and ends of words.
