The M-69s punched through thin roofing material or landed on the ground; in either case they ignited 3—5 seconds later, throwing out a jet of flaming napalm globs. Bombing of Sendai during World War II

It means massive murder, rape, looting, destruction of economy, starvation rations, foreign influence over culture, foreigners deciding over civil and criminal cases, foreigners bullying you on checkpoints and stealing private and national property with impunity. . For Grayling, guilt flows even to individual airmen; they, after all, failed to back away from what he believes were immoral deeds. Grayling indicts government and military leaders for permitting area bombing, knowing full well the consequences, as well as airmen who had a keen awareness of the missions and did not refuse to complete.

Among the Dead Cities

When you bomb Dresden, you aren't killing the perpetrators of the Holocaust. Grayling excuses, however, those airmen who were not completely aware of the consequences of their missions because of the exhortations of their superiors, the support of public opinion, or even their own, personal hatred of the enemy. And he is unapologetic about it.
