Antallet af andre sædelighedsforbrydelser er ligeledes øget stærkt, men her er det absolutte antal af sager så lille, at tallene skal tolkes med forsigtighed. If this hypothesis stands true, it would explain why consonantal weakening, including cluster gemination, is more complete in areas where Inuit became settled earlier Greenland, Nunatsiavut, and to a lesser extent, Nunavik and South Baffin 46, whereas it is still an ongoing process in those regions where sedentarization was more recent Thule, North Baffin, Kivalliq, and the central Canadian Arctic. Ud fra et nærværsprincip foreslås en lille anstalt nyoprettet på østkysten i Tasiilaq de tre nuværende anstalter er alle beliggende på vestkysten.
