## Dimensions Math PK

Throughout their time studying maths in primary school, both at KS1 and KS2, your child will be introduced a huge number of maths vocabulary, much of which may seem baffling — both to them and to you. For example, 2, 3, 4 and 6 are all factors of 12, as 12 can be divided into them exactly. Find out how children are able to make faster progress in maths with us and.

## From Math Negative to Math Positive Attitudes in Your Kids

You can do this quickly at the end of class with a short game of 3 to 5 questions.

## Dimensions Math PK

For example, children may solve a problem adding groups of toys together using real toys, or they may manipulate buttons, Lego, etc when working out fractions of amounts. Another twist on this strategy is for the students to create the statements.

## Dimensions Math PK

Metacognition Metacognition means to be aware of and analyse your thoughts and learning processes in order to make necessary changes to your learning behaviour. This method is usually taught using a number line, counting the jumps from one number to another.

## 15 Math Formative Assessments Strategies That Rock

Use a roll of butcher-block paper to combine math with physical activities that boost understanding and memory. The 24-hour clock goes from 00:00 midnight to 23:59 one minute to midnight.

[Primary School Maths Dictionary For Kids & Parents \[Free Download\]](#)

For example, the sum of 15 and 23 is 38. So, now make a plan for how you are going to incorporate formative assessment into your class and what actions you will take as a result.
