As Rescher points out, this leads to Kant's paradox of reconciling the two modes of causality agency and nature , the resolution of which lies in the coordination of two inseparable aspects of one comprehensive causal process. Nor is there any citation or dealing with the specific arguments of contemporary intelligent design theorists such as Michael Behe, Darwin's Black Box: The Biochemical Challenge to Evolution New York: Free Press, 1996 , William Dembski, The Design Inference Cambridge: Cambridge University Press, 1998 , or Stephen Meyer, Signature in the Cell: DNA and the Evidence for Intelligent Design New York: Harper Collins, 2009. This book has some good descriptions on how evolution and creationism can go hand in hand.

New Science: A Quantum View of Reality ~ Dr. Amit Goswami

It will be visible on your For Later shelf to others and any content you have added to the title will be shared. Goswami has written several other popular books based on his research on quantum physics and consciousness. By denying evolution altogether, says quantum physicist Amit Goswami, intelligent design believers fly in the face of scientific data.

Biology must come to terms with feeling, meaning, and the purposefulness of life, as well as with the idea of a designer. We can't seem to understand the video link or embed code. In his most recent book, Quantum Creativity: Think Quantum, Be Creative March 2014 , Dr.

Creative Evolution: A Physicist's Resolution Between Darwinism and Intelligent Design by Amit Goswami

For Rescher, emergence has brought forth, at the human level, intelligence, linguistic communication, symbolic information processing, reasoning, questioning, imagination, self-apprehension, empathy, love, valuing, and spiritual insight, which are all of theological value. Goswami posits that consciousness, not matter, is the primary force in the universe.
