The commands issued by the primary motor cortex are sent along what is called the descending pathways on their way to the brain stem and from there to the spinal cord. By learning over time from dopamine neuromodulation, it selects those actions which maximize reward and minimize negative outcomes.

L'œuvre de Kiyoshi Hasegawa est faite de cette matière venue de l'âme, elle est subtile et délicate, elle est œuvre idéale composée dans le silence de l'atelier avec des souvenirs visuels récents, mais transposés par la sensibilité orientale d'un pays lointain. Cette énorme somme de connaissance a été publiée sur une période de près de 15 ans, en 1987 Vol. This execution cycle is akin to traditional control-theory models that consist of modules that observe — perform state estimation, plan — learn a policy, and execute — carry out primitive actions.

On notera que l'auteur a comptabilisé les affiches lithographiques dans son étude. The subtexts of an artistic work are the theme of this series, which was developed by Tanztendenz and which presents choreographic thought and action in a personal format.

focus on questions of how important a stable architecture of differentiation and boundaries is for a society in maintaining its civilising standards, as well as how the expansion of the radius of empathy and solidarity to those formerly excluded can be achieved. Finding herself within the confines of a sterile and contrary system, Flora — the woman, the mother, the plant, the disease - instigates a skurril and absurd cycle of growth, infection, destruction and new life.

This young Chinese choreographer worked in the respective cities with dancers and non-professional persons who live there. The topography changes quickly to compensate for damage to the whiskers in the same way that somatosensory cortex undergoes changes to reallocate available areal coverage of neurons thereby optimizing for increased importance of the hands and fingers for concert pianist.
