### A

The project level requirements are often communicated through project specifications, and contract provisions.

### **Construction Time Card & Project Management Software**

Wood framed buildings can be partially or totally deconstructed. Facility Design The Contractor is responsible for the means, methods, techniques, sequences, and procedures of construction, which include waste disposal methods.

### **Construction Time Card & Project Management Software**

International trade and shipping will continue to present opportunities and risks for the responsible diversion, recycling, and disposal of waste.

### A

Collection, diversion, and disposal operations are the responsibility of municipal governments, while the approval, licensing and monitoring of operations are the responsibility of the provinces and territories.

### **Construction Waste Management**

As trades enter and leave the jobsite, each generates a relatively homogeneous waste stream, given the specific tasks and the materials with which they work. Materials may be sorted into a number of containers provided by service companies that specialize in management of specific types of waste at the jobsite.

### **Construction Time Card & Project Management Software**

Eliminating Waste Some waste generated in the process of construction can be eliminated.
