Grade 1 Science

Structure - the support frame of an object. When we were told that we should be able to make 2 equal piles it helped us see that half of the objects are things that can and should be found in nature and the other half are things that should not be found in nature. Differentiate between living and nonliving things.

Florida State Standards for Science: Grade 1

It explores why and how things move and make sound, and introduces energy and technology.

Science / State Science Assessment

Unit 3 — Animal and Plant Science This unit discusses concepts of life science, introducing life cycles and the parts, protection, and adaptation of plants and animals. It takes energy to change the motion of objects.

Mr Collinson's Grade 1 Science

All objects and substances in the world are made of matter. Plants and animals, including humans, interact with and depend upon each other and their environment to satisfy their basic needs.

FLORIDA SCIENCE FUSION Assessment Guide Student Edition Grade 1

The motion of objects can be changed by forces. We then prepared to discuss our findings with the class.

Florida State Standards for Science: Grade 1

We looked at several different fasteners, including a close up picture of what velcro looks like. For example, a newspaper is made from paper, both the object and the material are man-made, however the paper comes from trees, which is natural.
