## Climate Science Special Report

The impacts on natural and human systems would be greater if mitigation pathways temporarily overshoot 1. American Journal of Drug and Alcohol Abuse 29:647–670, 2003. Brief interventions often consist of only one or two short sessions, which are compatible with busy medical settings.

## JLARC

Dill and Elisabeth Wells-Parker References Cavaiola, A. Treatment referrals may involve several components because DUI offenders are diverse, both in terms of level of alcohol abuse and other characteristics, such as comorbid conditions, that may increase their risk of repeating their offense or becoming involved in a crash Wells-Parker and Popkin 1994. A recent review of strategies to reduce problem drinking among college students found that information-based and values-clarification programs were not effective, while some skills-based interventions e.

## NIAAA Publications

However, those options are limited by institutional, economic and technical constraints, which increase financial risks to many incumbent firms medium evidence, high agreement.

## Special Report: Quadrennial Defense Review

Heavy precipitation associated with tropical cyclones is projected to be higher at 2°C compared to 1.

## Reports

DCYF produces numerous reports throughout the year to meet state and federal requirements, detail recent research or analysis, and to highlight progress on program initiatives.

## Reports

Defining the goals of mandated treatment and determining how best to measure them can be challenging. Brief interventions can be offered in a broad range of settings, are cost-effective, and may be used along with other rehabilitative modalities to enhance the motivation and self-confidence to change drinking-and-driving behavior.

### **Special Protections for Children as Research Subjects**

Changes in the DUI Offender Population The characteristics of the DUI offender population have been changing in response to stricter laws, such as zero-tolerance laws for underage drinkers which set the legal blood alcohol limit for drivers younger than age 21 at 0. TRB Special Report 323: In-Service Performance Evaluation of Guardrail End Treatments develops a research design for evaluating the in-service performance of guardrail end treatments and other roadside safety devices and identifies the data required to do so. Feasibility is considered in this report as the capacity of a system as a whole to achieve a specific outcome.
