## Why we go bald: an evolutionary hypothesis

Typically, we begin with a broad and general theory and use deductive reasoning to generate a more specific hypothesis to test based on that theory. Some women find that the minoxidil solution leaves a deposit that dries and irritates their scalp. This link is suspiciously similar to the link between heart disease and periodontitis DeStefano et al.

## Do hair growth treatments actually work?

The exact cause of AGA is unknown, but the androgen DHT is believed to be a major culprit.

## Do hair growth treatments actually work?

At Yokohama National University, scientists led by Junji Fukuda have for generating new hair follicles from stem cells in far higher quantities than ever before, while later this year, scientists at the will launch one of the first ever clinical trials with hair follicles grown entirely from stem cells. In exchange for free medical care, meals, and burial insurance, 600 men agreed to participate in the study.

## What Are the Solutions to Political Polarization?

Theories can change, but it is a long and difficult process.

## Hair Loss or Alopecia

The scientific method is a process for gathering data and processing information. The procedure also requires recovery time.

## What Are the Elements of a Good Hypothesis?

To test these theories, the researchers asked people to recall either six times when they were assertive which is easy for most people or 12 times which is difficult for most people. Hormonal shifts that occur during menopause may also spur it.
